SUMMARY

Third-year Computer Networks and Data Communications student with hands-on experience building cloud and DevOps projects using AWS, Terraform, Docker, Kubernetes, CI/CD, GitOps, and monitoring tools. Strong interest in infrastructure automation, cloud networking, system reliability, and production deployment workflows.

EDUCATION

University of Information Technology, VNU-HCM

2023 – Present

Bachelor of Engineering in Computer Networks and Data Communications

Ho Chi Minh City, Vietnam

- **Year:** Third-year student | **GPA:** 8.6/10
- **Relevant Coursework:** Computer Networks, Network Security, Cloud Computing, Linux System Administration, Database Systems

SKILLS

Programming & Scripting: Python, Bash/Shell, SQL, C++, JavaScript basic, HTML/CSS basic

Cloud & DevOps: AWS EC2, VPC, IAM, S3, Terraform, Docker, Kubernetes, GitHub Actions, Argo CD, CI/CD, GitOps

Linux & Monitoring: Linux, Ubuntu, Prometheus, Grafana, Jaeger, log/metric collection, basic troubleshooting

Networking: TCP/IP, DNS, HTTP/HTTPS, OSI model, VLAN, Routing, VPN, Firewall basics, Cloud Networking

Data & MLOps: PostgreSQL, MySQL, Airflow, MLflow, MinIO, Model Registry

Tools: Git, GitHub, Postman, VS Code, AWS CLI

Languages: Vietnamese native, English - TOEIC Speaking & Writing 280/400

PROJECTS

AIOps and MLOps Platform | GitHub

- **Tech Stack:** Python, Kubernetes, Docker, MLflow, PostgreSQL, Prometheus, Grafana, Jaeger
- Built a Kubernetes-based AIOps platform for anomaly detection, root cause analysis, runtime inference, and incident feedback collection.
- Integrated Prometheus, Grafana, and Jaeger for metrics, dashboards, tracing, and observability-driven troubleshooting workflows.

End-to-End Microservices Deployment | GitHub

- **Tech Stack:** AWS, Terraform, Ansible, Kubespray, Kubernetes, Docker, Argo CD, Kustomize
- Built a CI/CD and GitOps deployment workflow for Kubernetes-based microservices using GitHub Actions, Argo CD, and Kustomize, from infrastructure provisioning to application synchronization.
- Automated AWS infrastructure provisioning with Terraform and Kubernetes cluster bootstrapping with Ansible/Kubespray to improve deployment consistency.

AWS Hybrid Cloud Infrastructure | GitHub

- **Tech Stack:** AWS, Terraform, EC2, VPC, S3, IAM, NAT Gateway, WireGuard VPN, Linux
- Implemented hybrid-cloud connectivity with WireGuard VPN and bastion host access to securely reach private workloads without exposing them directly to the Internet.
- Practiced AWS networking, Linux server access, routing configuration, and basic infrastructure troubleshooting.
